# Welcome to **techsit**

If you already know us, you'll know us for our Werksitz range of technical seating – a superb range of industrial chairs... particularly fab in PU!

But some of our customers have also been asking us for a mid-range excellent quality upholstered chair for the UK market.

(Apparently many of us Brits prefer an upholstered seat!)

So here is the new Techsit range. We've created it based on our usual principles of quality, ergonomics and value for money. Plus, of course, our general rule of 'keep it simple'.

**L-tech** is all that you need for labs or production

**e-tech** is for all your ESD needs

**C-tech** is your go-to for everything a cleanroom requires

To keep it simple, it's built around a modular design, so our one chair becomes exactly what you need as you flex the component parts. It's a true ergonomic chair, produced to a seriously high standard, that is real value for your money.

Even better, it's produced in the UK.

We hope you like it... so get flexing and decide what chair is best for you. Any queries just give us a call on **01480 458443** or drop us a line at [info@officestor.co.uk](mailto:info@officestor.co.uk)

It's as simple as that.

P.S. some of your queries may be answered at the back of this brochure (heights / measurements / fabrics / guarantees etc)

## height

Our gas lifts come in three heights and all with a 150kg weight capacity. On high chair models a foot ring comes as standard.

## back

Cold-cured moulded foam back with double curvature for ultimate comfort. Height adjustable for ergonomic fit. Available in 2 sizes.

## arms

Your choice of fixed, adjustable or without arms. (Adjustable for height, width and depth.)

## mechanism

Our chairs come with back-rake as standard and you have the option of independent seat tilt or synchro mechanisms.

## seat

Cold-cured moulded foam seat for ultimate comfort

## Castors and glides

Depending on the work environment, choose from castors, glides, brake-loaded or unloaded castors, ESD versions or hard-floor castors.

**L-tech**  
Laboratory seating

Designed to provide the ultimate ergonomic solution for laboratory, production and healthcare environments. (and they're great to sit on!)

# c-tech

Clean room seating

Designed for use in electronic, pharmaceutical and medical industries these chairs have it all: anti-static, conductive AND cleanroom compatible to class 7. Plus of course ergonomic design and perfect comfort.

The only thing they don't have is colour – for cleanroom environments black really is the new black!
